Paper No(s)/Mail Date. \_\_\_\_\_

5) Notice of Informal Patent Application

6) Other: \_\_\_\_\_

1. Applicant's paper filed on 6/10/2008 has been received and entered. Claims 1-12 have been cancelled. Claims 13-24 have been added. Claims 13-24 are pending in the application.
2. Applicant's remark has been considered, but it is not persuasive to claims 17-20.
3. After reviewed by the specialist, the new claims 17-20 is not overcome the rejections under 112, 2nd paragraph and 101 rejections as applicant's opinion stated. Since the selecting can not operating by itself without any calculating and comparing. How to identify the shoe tip profile is right to select? Noted that to read in light of the specification, the claim should also included the essential steps to perform operation to overcome 112, 2<sup>nd</sup> paragraph rejection under omitted step section to make the claim invention clear and concise, and 101 rejection to the claim under descriptive data per se (such database and computer per se) which does not perform computations and comparing, has been determined to be non-statutory.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 17-20 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: calculating and comparing to identify the selected tip profile.

6. In claim 17, line 2, "the first toe" lack antecedent basis. In claims 18-19, what's "a first angle" that applicant want to represent to?. And what's "a second angle" that applicant want to represent to?.

***Claim Rejections - 35 USC § 101***

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 17-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim itself appears to be descriptive matter or descriptive data per se which does not perform computations and comparing, has been determined to be non-statutory. It is also merely appears as directed to an abstract idea by the descriptive data operating of database and computer per se.

***Allowable Subject Matter***

8. The following is a statement of reasons for the indication of allowable subject matter: Claims 1-16 and 21-24 are indicating allowable over the prior art of record. The prior art of record fails to teach the claimed combination as recited, and the applicant's amendment overcome the rejections of the previous office action.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
